

Medical Ministries, Inc. has partnered with local community churches in a unique approach to delivering healthcare.

Key partners are:

- Cerberus Healthcare LLC, utilizing the electronic health record (EHR) tracking patients from clinic to clinic in consistent care and producing healthier outcomes.
- Dr. Alan Abel, Medical Director of Medical Ministries Inc., also provides medical care for the patients.
- Participating churches provide the physical facilities where the health clinics are located. The churches also provide pastoral guidance and clinic volunteers.

The first clinic opened June 12, 2012. Four faith-based clinics have since opened, in four different locations. The Medical Ministries have grown to more than 500 patients and have proven its ability to deliver quality health care.

Medical Ministries Inc

A letter from the Medical Director

Dear Ladies and Gentlemen,

My opinions and facts are based on my experience as a practicing physician for more than 40 years in North Charleston, SC. I began my practice at the Franklin C Fetter Clinic in Charleston, South Carolina, providing care for those in need regardless of the ability to pay. I'm still practicing family medicine in my North Charleston office and for the past two years have served as medical director for the Medical Ministries clinics at New Hope United Methodist Church, Wesley United Methodist Church, Shady Grove United Methodist Church, and now St Mark United Methodist Church in North, S.C.

Many people in the rural area of South Carolina lack medical care because they either cannot afford it or they do not have access to healthcare facilities. They may have such medical conditions as diabetes, hypertension, obesity, arthritis, skin disorder, anxiety, depression and many more significant problems that have gone untreated. Some patients have not seen a doctor. in years

These patients have been so appreciative for the care we provided to them. I feel good when I leave the clinics, realizing the difference I may have made in their lives. That is why I am excited about the prospect of opening many such clinics in South Carolina based on the current model set up by the Medical Ministries, Inc.

Respectfully,  
Alan N. Abel MD.
